CERTIFICATION

• Certified in Core Web Design from ITVEDANTH	SEP 2024
• Certified in SQL Database Management from ITVEDANTH	OCT 2024
• Certified in SQL and Relational Databases 101, HTML and Java from IBM	FEB 2025

PROJECTS

Portfolio Website (React Development)

MAR 2025

Developed a dynamic and responsive personal portfolio website using React. Implemented interactive features and smooth transitions to highlight projects, skills, and experience. Utilized React components for efficient, reusable UI elements and ensured cross-browser compatibility to deliver a seamless user experience. Integrated modern design practices to create a clean, professional layout that effectively showcases work in a visually appealing manner.

BEGET Restaurant (Spring Boot Development)

FEB 2025

Developed the back-end of the BEGET Restaurant website using Spring Boot and Java. Implemented RESTful APIs for managing restaurant data, such as menu items, orders, and customer details. Utilized Spring Data JPA for database interaction, ensuring efficient data retrieval and updates. Integrated Spring Security for secure user authentication and authorization. The project also involved creating a robust admin panel for managing restaurant operations, all while maintaining a focus on scalability, performance, and user-friendly interfaces
